Tehran, Iran

I am a Front-End developer/engineer, passionate about JavaScript, how it really works and its underlying features. I also pursue the world of JavaScript engines and browsers. Vue is the framework of my taste, and I'm using it since its first release. I'm also experienced with NodeJS and MongoDB mostly for my personal projects.

EXPERIENCE

Front-End Developer / NodeJS Developer at Alibaba group

2019 — Now  Tehran, Iran

- + Working on a new Content Management System from scratch, called "Traffic"
- + Develop a CDN service for working with images
- + Develop a brand new content/layout editor with Vue
- + Published bunch of plugins and packages on npm

Front-End Developer at Orchid Pharmed

2018 — 2019  Tehran, Iran

- + Maintained and optimized front-end of a big legacy web application called eCRF that was written with jQuery and ES4.
- + Made a secret chat web application from scratch with Vue for company's internal usage.

Web Developer at Peivast Monthly

2012 — 2016  Tehran, Iran

- + UX design, UI design, front-end and back-end development of the official website using wordpress as CMS
- + Responsible for website's content
- + Social networks management
- + Animating covers for each number using Adobe Animate

OSS

GHOSTAX

<https://ghostax.netlify.com>

A renderless vue framework. Heavily relying on scoped-slot concept.

vue-container-query-2

<https://npmjs.com/package/vue-container-query-2>

Vue plugin to work with container queries

Other stuff on Github and npm...

EDUCATION
